Professional Summary

Frontend Developer with strong fundamentals in **HTML, CSS, JavaScript, React, and Bootstrap**, focused on building **responsive, clean, and user-friendly** web interfaces. Skilled in creating **reusable React components**, handling **state and events**, and implementing forms and validations. Comfortable with **MySQL and MongoDB basics** for working with structured data, along with debugging and writing maintainable code. Seeking an entry-level role to contribute to real product features, and grow as a modern frontend developer.

Education

YSR Engineering College of Yogi Vemana University

Bachelor of Technology in Computer Science - CGPA: 8.4

2022 – April 2026

Proddatur, Andhra Pradesh

Sri Chaitanya Junior College

CGPA: 8.9

2020 – 2022

Tirupati, Andhra Pradesh

DAV Model High School

SSC - CGPA: 9.4

2011 – 2020

Zuari Cement Ltd, Andhra Pradesh

Relevant Coursework

- Nxtwave CCBP 4.0 Certification Program in Full Stack Development

Projects

HooBank(finance-91c3xepkj-nehas-projects-497b52b5.vercel.app/) | *React, Vite, Tailwind CSS*

- Built a responsive HooBank landing site delivering a modern layout with reusable UI sections (Hero, Stats, Features, Pricing, Clients, Footer).
- Implemented **client-side routing** with **React Router**, enabling multi-page navigation (Home, Pricing, Contact) while keeping shared components consistent across routes.
- Fixed build/import issues by standardizing component exports and Tailwind content configuration, improving reliability and maintainability.
- Developed functional CTAs by wiring “**Get Started**” buttons to a **validated modal lead form**, storing submissions locally for demo purposes and showcasing state management + form handling.
- Improved UI reliability by fixing Tailwind content configuration and component export structure, resolving build/import issues and ensuring consistent typography, contrast, and component composition.

Wikipedia Search (pnehawikipedia.ccbp.tech) *JavaScript, REST API Calls, HTML, CSS*

- Built a Wikipedia Search application that fetches live results using REST API calls and renders them as clean, readable cards with title, snippet, and source link for fast browsing.
- Implemented a responsive, mobile-first UI using HTML and CSS with proper spacing, typography, and loading states, ensuring smooth experience across different screen sizes.
- Improved reliability by handling API errors gracefully (network failures, empty results), showing helpful feedback instead of blank screens, and keeping the UI stable during async updates.

Todos API (pnehatodolist.ccbp.tech) | *HTML, CSS, JS*

- Built a responsive Todo List web app that lets users add, edit, complete, and delete tasks, focusing on clean UI flow and easy task management for daily productivity.
- Implemented localStorage-based persistence so todos remain saved after refresh or browser reopen, including restoring completed states and maintaining task order reliably.
- Enhanced usability with filters like All/Active/Completed and a “Clear Completed” option, enabling quick navigation and reducing clutter for better task tracking. .

Technical Skills

Languages: Python, Java Basics

Frontend: HTML5, CSS3, JavaScript, React, Bootstrap

Backend: Node.js, RESTful APIs

Databases: MySQL, MongoDB
